OETI - Institute for Ecology, Technology and Innovation

## Understanding you - wherever you come from!

Together with our Swiss parent company "TESTEX AG", we have an international network of subsidiaries. For our customers, this means quick reaction times via our local

contacts in a large number of countries - they speak your language and can therefore better respond to your needs.

# RELIABLE, HIGH-QUALITY CONSULTING, TESTING AND CERTIFICATION SINCE 1967

---

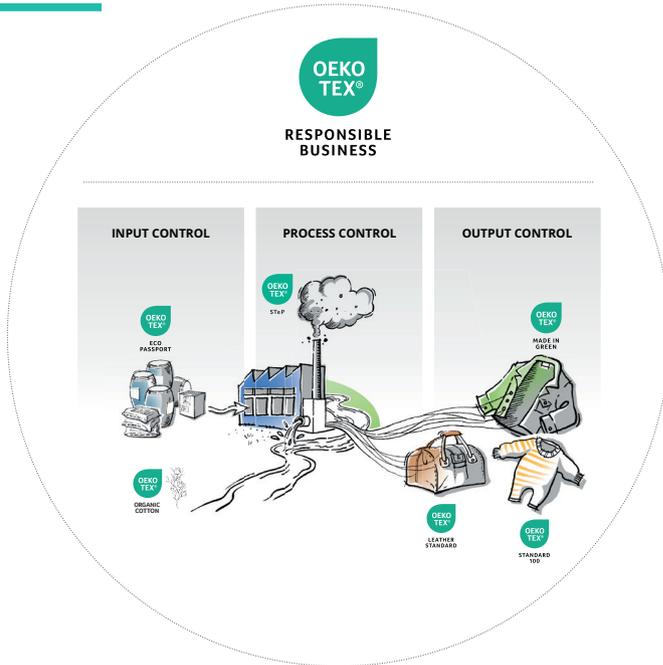

OETI has decades of expertise and a specialist team offering comprehensive service and safety in the areas of ecology, textiles, personal protective equipment (PPE), flooring technology and interior design.

Tested and certified under environmental and technical safety standards. We work independently, professionally and efficiently to find solutions, using test devices at the cutting edge of technology.

Take advantage of our testing and certification services  
to improve your products, services, processes and production plants.  
Quality, sustainability and innovation are our driving forces.

- We are an **accredited testing and certification body**. This means that we can guarantee reliable quality geared towards the latest standards on the market.
- As a **founding member of the OEKO-TEX® community and an official OEKO-TEX® testing institute**, we offer production plants, retailers and brands the entire OEKO-TEX® product portfolio for manufacturing textile and leather products that are harmless to health, environmentally friendly and socially responsible.
- We test and certify your indoor air using the **“CLEANAIR” STANDARD by OETI**.
- We certify your products, services, production processes and plants with the **“INSPECTED QUALITY”** label by OETI.
- We certify your in-house laundry services for hotels and catering with our **“Klasse Wäsche INSPECTED QUALITY”** label.

# OUR RANGE OF SERVICES

## Ecology, OEKO-TEX® and harmful substance testing

As a focus, OETI offers all services in the OEKO-TEX® product portfolio and carries out emissions and harmful substance testing on products. We test your products for compliance with REACH and offer screenings and testing against the Manufacturing Restricted Substances List (MRSL) and Restricted Substances List (RSL).

We are the  
international centre of  
excellence you can trust

## Textile Technology and Personal Protective Equipment (PPE)

Our core services include the certification of personal protective equipment and the certification of FFP2 masks to obtain CE marking. We also offer a comprehensive technical testing programme for textiles along their entire production chain (fibres, textile fabrics, material composites, ready-made garments).

## Flooring technology and interior design

We have decades of experience in the testing and assessment of textile, elastic and laminate flooring. Our repertoire also covers all possible applications for flooring technology and materials for interior design.

## INNOVATION

Progress and innovation enable new and improved service and product experiences and also ensure our competitiveness in the marketplace.

This means that, as our customers evolve, we evolve with them and constantly improve our services and equipment to stay up to date to serve our customers in the best possible way.

In terms of innovation, we work across all sectors with experts from the OETI business areas of ecology and technology.

OETI is an accredited testing and certification body.  
An overview of our accreditations and notifications:

## ACCREDITATIONS AND NOTIFICATIONS

---

- Accredited by the national accreditation body “Accreditation Austria” as a testing body under EN ISO/IEC 17025
- Accredited by the national accreditation body “Accreditation Austria” as a certification body for products (personal protective equipment) under EN ISO/IEC 17065
- Notified Body 0534 for type examinations and monitoring quality assurance for the end product of personal protective equipment in accordance with PPE Regulation (EU) 2016/425
- Notified Body 0534 testing body for flooring under the Regulation of Construction Products 305/2011
