ECS - European Certification Service

Understanding you – wherever you come from!

Together with our parent company, TESTEX AG, and our subsidiary, ECS GmbH (a testing and certification body for eye and face protection), we have an international network of branches.

For our customers, this means quick reaction times via our local contacts in a large number of countries – they speak your language and can therefore better respond to your needs.

SINCE 1967

RELIABLE, HIGH-QUALITY CONSULTING, TESTING AND CERTIFICATION

OETI has decades of expertise and, with its specialists, offers comprehensive services and safety in the areas of OEKO-TEX®, due diligence along the textile and leather supply chain, textiles, personal protective equipment (PPE), flooring technology, interior design

materials, and indoor air quality.

We test and certify according to ecological and safety standards. We work independently, professionally, efficiently, solution-oriented and with state-of-the-art testing equipment.

Your competitiveness is our priority!

Independent, professional and solution-oriented,
with state-of-the-art testing equipment.

- We are an **accredited testing and certification body**. This means that we can guarantee reliable quality geared towards the latest standards on the market.
- As a **founding member of the OEKO-TEX® Association and an official OEKO-TEX® testing institute**, we offer manufacturers, retailers and brands the entire OEKO-TEX® product portfolio for textile and leather products that are harmless to health, environmentally friendly and socially responsible.
- We test and certify your indoor air using the **CLEANAIR STANDARD by OETI**.
- We certify your products, services, production processes and plants with the **INSPECTED QUALITY** label by OETI.
- We certify your in-house laundry services for hotels and catering with our **Klasse Wäsche INSPECTED QUALITY** label.

OUR RANGE OF SERVICES

Ecology, OEKO-TEX® and harmful substance testing

As a focus, OETI offers all services in the OEKO-TEX® product portfolio and carries out emissions and harmful substance testing on products. We test your products for compliance with REACH and offer screenings and testing against the Manufacturing Restricted Substances List (MRSL) and Restricted Substances List (RSL).

The international centre
of excellence YOU can trust!

Textile technology and personal protective equipment

Our core services include the certification of personal protective equipment and the certification of FFP2 masks to obtain CE marking. We also offer a comprehensive technical testing programme for textiles along their entire production chain (fibres, textile fabrics, material composites, ready-made garments).

Flooring technology and interior design

We have decades of experience in the testing and assessment of textile, elastic and laminate flooring. Our repertoire also covers all possible applications for flooring technology and materials for interior design.

INNOVATION

Progress and innovation enable new and improved service and product experiences, thus ensuring your competitiveness in the marketplace.

To keep up to speed with the times and technology, we are constantly developing our services and processes to offer you crucial added value.

In terms of innovation, our experts from OETI's Ecology and Technology business areas collaborate cross-divisionally and interdisciplinarily.
